

Environmental Policy

Olympus Holding · Version 2.0 · 13 May 2026 · Public

Olympus is an industrial design and sourcing firm which specialises in automotive, transportation and energy solutions. Olympus are based in Malta and have been creating practical design solutions for a global market since 2017.

Olympus focus on the design, engineering and supply of small volume production and manufacture of performance-oriented products in niche markets ranging from supercars to rescue and military vehicles.

Olympus stand out in industry for their combined knowledge of design, engineering, and manufacturing, where their collective experience makes them fast, practical, and experienced.

Olympus adopts an Environmental Management System based on the requirements of SM EN ISO 14001:2015.

Olympus has established the following strategic objectives to be pursued through the Environmental Management System (EMS):

Long Term Vision

- To aspire to be a sustainable organisation that sustains the environment related to commercial activity.
- To protect the environment that is affected by the operations and commercial activity.
- To protect the environment including the prevention of pollution.
- To explore every opportunity to demonstrate a positive impact on the environment in all activities.
- To ensure compliance with applicable legal and other requirements related to the environment.

Resources

- To minimise the generation of wastes from all the activities and operations.
- To significantly reduce greenhouse gases from the activities and operations.
- To reduce the contribution to human-induced Climate Change.

Environment

- To remain committed to continuous improvement in all work practices.
- To constantly demonstrate leadership, and nurture continuous improvement across Olympus.
